

GRINDMASTER 950

HORIZONTAL STONE GRINDING MILL

Meeting your needs for high quality, healthy wholemeal flour, grits or high class flour

HEALTHY FLOUR THROUGH OPTIMUM GRINDING

The GRINDMASTER stone mill professionally and simply does the job through the optimum milling process using proven and well-known ENGSKO millstones in a sturdy design. The heavy duty mill, aimed for industrial purposes, has a strong frame, hard-wearing shaft and bearings. The adjustment of the stones has an adjustment gear for fine tuning.

All in all an industrial mill used for grinding whole grain into grits/ healthy and good whole meal flour or for grinding of flour grits into high class flour as the last break after a roller mill.

INDUSTRIAL / DECENTRALIZED STONE GRINDING MILLS

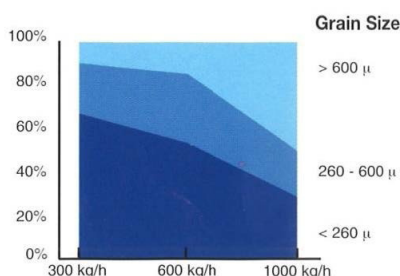

The superior thing about the GRINDMASTER stone mill when used in ENGSKO's decentralized flour mills for milling high class flour at a high yield is that the process only uses 4 milling breaks. In this

Grindmaster 950

unique combination of 3 break roller milling and 1 break stone milling the stone mill produces a high quality, fine flour from the fine, white grits from the roller mill.

Fineness Compared to Capacity

FLOUR READY FOR BAKING

The flour produced on a GRINDMASTER stone mill contains all the natural vitamins and minerals in the grain and can be used for baking without further processing. Furthermore, the stone ground flour has a large surface increasing the ability to absorb liquid, giving an airy and elastic dough easy to work with.

PERFORMANCES AND DEGREE OF GRINDING (WHEAT)

MODEL	Grindmaster 950	
Motor power, kW	15	18,5
Grinding Mill RPM	300	
Kg/h fine/coarse	250	800
% of flour, grain size below 260 my (micron)	70	28
% of flour, grain size above 260 my (micron)	20	22
% bran, grain size above 600 my (micron)	10	50

Average values for fine and coarse flour grits. If other sieve analyses are required, please ask us

DIMENSIONS

Length, mm	1880	
Width, mm	1050	
Height, mm	1632	1260
Weight, kg	1250	

TYPES OF SETTING OF STONES

- Manual (as seen on the photo)
- Automatic presetting
- PLC steering of stones

All models can be fitted with a stainless steel base around the stones and outlet.

ENGSKO MILLSTONES

The heart of the mill is the famous ENGSKO millstones:

Hard, good quality and made exclusively from natural materials.
